## **DETAILED ACTION**

### **Prelim./Amdt.**

Receipt is acknowledged of the amendment filed 10/30/03 and papers submitted under 35 U.S.C.119(a)-(d), which papers have been placed of record in the file.

#### *Claim Objections*

Claims 1-6 are objected to as being indefinite. Applicant discloses two display panels, 41 and 61.

Which panel is referred to in claims 1-6?

The following claims have been rejected in light of the objection to the claims, but rendered the broadest interpretation [MPEP 2111].

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5 are rejected under 35 U.S.C. 102(a) as being anticipated by USPN 6,820,875 to Hedrick, et al. A gaming machine having cabinet, light source, decorative panel, support means for supporting decorative panel and a detachably attached frame is disclosed by Hedrick.

Regarding claim 1, A gaming machine (10a) comprising:

a cabinet (12);

a light source in the cabinet (claim 17)

a decorative panel (152, "enables old masks to be replaced with new masks

representing new games or effects") including a first surface for receiving light (152);

support means (154), provided with the cabinet, for supporting panel from first surface a frame (156), detachably attached to the cabinet (12), including a back face for supporting decorative panel “gaming device 10 includes a frame 156 that connects to housing 12” from a second surface of the panel opposite first surface when frame secured

Regarding claim 2, according to claim 1, support means (154) supports panel while in contact with only a peripheral part of panel (figure 9).

Regarding claim 3, according to claim 1, frame has safety means, “locking mechanism 158 removably secures frame 156”

Regarding claim 4, according to claim 3, frame includes insertion opening for panel from a bottom end of frame (column 8, lines 33-39).

Regarding claim 5, according to claim 3, shaft axially supports end of frame (column 8, lines 62-67, column 9, lines 1-27).

*Allowable Subject Matter*

Claim 6 is further objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if the other objection is withdrawn.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 6, according to claim 5, adds a cover to back face of frame that exposes a peripheral part of

first surface of panel, covering the light source with opening directed toward the frame. This combination of limitations is not taught or disclosed in the art of record.
